Sporty, dynamic safety shoe made from innovative, sustainable materials.

Environmentally friendly with a designer leather upper with minimal seams and a reinforced toe. Interior made of breathable materials.

Aluminium toe cap and puncture-resistant fabric sole. Innovative BOA[®] lacing system. Anatomic insole made of recycled POLY-GREEN polyurethane – soft and shock-absorbing for the utmost in comfort. New sole with an intelligent system that ensures comfort in motion. The sole, which adapts to the terrain, is designed to conserve energy with each footstep. This stabilises the foot and guides it into the right position to lower the risk of injury. The shock-absorbing sole is made of recycled POLY-GREEN polyurethane. Non-slip polyurethane outsole. Labels made from 100% recycled material. 100% recycled
